NOTES AND NEWS

THE University of Louvain announces the publication of Book I. of Aristotle's "Metaphysics." With this volume the *Institut supérieurement de Philosophie de Louvain* commences the publication of a series of studies on the philosophy of Aristotle having the general title: *Aristote: Oeuvres philosophiques: Traductions et études*. We quote from the circular: "A translation of the principal philosophical treatises, a critical commentary, at the culminating point of philological and historical progress, requires a collective effort. The undertaking will exhibit the necessary qualities of unity and accuracy the more clearly, since its authors are actuated by a common motive and possess similar points of view. At a university, founded, as was the University of Louvain, for the express purpose of teaching the Thomist philosophy, an exhaustive study is necessarily made of the works of the master of Saint Thomas

Aquinas; his works are read and analyzed with care. Naturally the thought presented itself to the students, who so familiarized themselves with Aristotle's theories, that they should arrange for publication, each upon his own responsibility, the result of their researches and reflections. The collection will comprise translations of various philosophical treatises and studies connected with the text and doctrines of Aristotle. Each volume will be published upon completion. The translation of the first book of the *Metaphysique*, which is the work of M. Gaston Colle, is the fruit of a long and conscientious labor, based upon a study of the commentaries of early writers and the best works of contemporary writers. The notes in connection with the volume aim to be primarily a key to the text. The difficulty and merit of the undertaking should command the gratitude of all philosophers."

JULES HENRI POINCARÉ, the illustrious mathematician, died suddenly on July 17. He was born on April 29, at Nancy, and was educated at the Lyceum of Nancy and at the Ecole Polytechnique. From the Universities of Cambridge and Oxford he received the degree of Doctor of Sciences. He was a Commander of the Legion of Honor, a member of the French Institute and of the Bureau of Longitudes, a professor of mathematics at the Ecole Polytechnique, and Chief Engineer of Mines. He was a member, also, of the Académie Française. The Paris newspapers are unanimous in asserting that M. Poincaré was the greatest scientist of modern France. The *Figaro* says his death is the greatest loss that the contemporary world of science could suffer.

PROFESSOR A. S. PRINGLE-PATTISON has just delivered the first course of his Gifford Lectures at the University of Aberdeen. The subject of the course was, "Contemporary Thought and Theism," and the ten lectures had the following titles: "Hume's Dialogues concerning Natural Religion"; "The Idea of Value as Determinative"; "The Philosophical Problem in the Latter Half of the Nineteenth Century"; "The Emancipating Influence of Biological Science"; "The Lower and the Higher Naturalism"; "Continuity of Process and the Emergence of Real Differences"; "Man as Organic to the World"; "Ethical Man, The Religion of Humanity"; "Positivism and Agnosticism"; "Retrospect and Provisional Conclusions."—*Philosophical Review*.

THE second International Congress on Moral Education will be held at The Hague, August 22 to August 27. The first congress was held at the University of London, September 25 to 29, 1908, and at that meeting a large number of the leading educationists of the world were present.

DR. ALFRED H. JONES, of Cornell University, has been appointed professor of philosophy at Brown University, to succeed Dr. Alexander Meiklejohn, recently elected to the presidency of Amherst College.

THE death of Dr. Shadworth H. Hodgson, the English metaphysician and philosopher, occurred June 13.

M. E. HAGGERTY, of Indiana University, has been promoted from assistant professor to associate professor of psychology.
